

ART FOR SCREEN PRINTED T-SHIRTS

Common Print positions

Front; left chest 2.75-3" wide, center chest 3-5" wide, or center front 9.5" wide

Sleeves: 3.5" wide

Back 10.5" wide x 12" high

The more print positions and ink colors, the greater the cost.

Screen printing price goes down nicely on orders of 48+ units since there are no set ups on 1-6 color projects.

Printing 1-6 color projects delivers in 3-8 days. Always advise on deadlines for your delivery.

Printing 7-12 colors best on orders of 150+ units with 2.5-3 week delivery.

Art: usually vector based art with colors set to pantone coated values and fonts converted to art. Make art to size or note the size for each position. If in Adobe Illustrator CS2, save as an EPS file but downgrade it to release 10.

If art is a scanned image, please do not vectorize it. Send 300 dpi scanned file at print size. We will convert the file to a combination of vector and process art. For quantities under 48 units this art might be digitally printed rather than screen printed.

ART FOR NON-WEARABLES

Vector based art with colors set to pantone coated values and fonts converted to art.

Make art to size or note the size for each position. If in Adobe Illustrator CS2, save as an EPS file but downgrade it to release 10.
